1. Loan Request Summary

Borrower	Nordvik Energy AB (556789-1234)
Loan Amount Requested	SEK 800 million
Purpose	Construction of 200 MW onshore wind farm (Vastervik Phase II)
Tenor	7 years, bullet repayment
Pricing Indication	STIBOR 3M + 175 bps
Collateral	First-priority pledge on project assets and assignment of PPA revenues

2. Project Description

Vastervik Phase II is a 200 MW onshore wind project located in Kalmar County, Sweden. The project has all environmental permits in place (decision dated 2024-06-15) and a 15-year fixed-price Power Purchase Agreement with a Nordic utility rated A- by S&P.

Expected annual generation: 580 GWh (P50 estimate, validated by DNV).
Construction period: 18 months, starting Q2 2026.
EPC contractor: Vestas Wind Systems A/S (turnkey contract at SEK 650 million).

3. Financial Projections

Projected annual revenue: SEK 290-320 million (based on PPA price of SEK 500/MWh).
DSCR during operations: 1.35x - 1.55x (base case).
Project IRR: 9.2% (unlevered).
Break-even electricity price: SEK 340/MWh.

The project is expected to be EU Taxonomy-aligned for climate change mitigation (climate mitigation) as a renewable energy activity under NACE code D.35.1.1.

4. Management & Sponsors

CEO: Lars Eriksson (15 years in Nordic energy sector).
CFO: Maria Andersson (former VP Finance at Vattenfall).
Board Chair: Gustav Svensson (former CEO of Swedish Energy Agency).

Shareholders: Nordvik Holdings (60%), Nordic Infrastructure Fund II (25%), Management & Board (15%).

5. Key Risks

- Construction risk: mitigated by turnkey EPC, 10% contingency budget
- Wind resource risk: P90 generation covers debt service at 1.1x
- Regulatory risk: Swedish energy policy stable, permits secured
- Counterparty risk: PPA buyer rated A-
- ESG / climate physical risk: low; site not in flood or wildfire zone
